Jerryn Cheenical Joy

Date of birth: 28 Jun 1994 | **Place of birth:** Pune, India | **Nationality:** Indian | **Phone number:** (+49) 17643310478 (Mobile) | **Email address:** jerrynjoy.jj@gmail.com | **LinkedIn:** https://www.linkedin.com/in/jerryn-cheenical-joy/ |

Address: Marienau 1, 70563, Stuttgart, Germany (Home)

ABOUT ME

Experienced AI Automation Specialist with expertise in designing and implementing AI-driven workflows and smart process automation. Proficient in no-code/low-code platforms such as Make.com, Zapier, n8n, Microsoft Power Platform to improve business efficiency. Skilled in API integrations, webhooks, and cloud-based tools (Brevo CRM, Google Workspace) to automate sales, marketing, and customer support. Hands-on experience in building agentic automation systems and AI-powered chatbots using OpenAI, Voiceflow, Copilot Studio, and LangChain. Knowledge of Python for automation scripting and data-driven problem solving. Experienced in Agile project management (JIRA, Confluence), with strong cross-functional collaboration and stakeholder management experience delivering scalable, impactful solutions in fast-paced startup environments.

WORK EXPERIENCE

1 FEB 2024 – CURRENT Stuttgart, Germany

AI PRODUCT OWNER HYFINDR GMBH

AI Customer Support Chatbot

- Designed and implemented a conversational AI chatbot using Voiceflow and integrated into the company website, automating 40% of manual customer replies and significantly improving response times.
- Automated audio-to-text transcription by connecting Make.com with OpenAI Whisper, reducing manual content creation for the chatbot's knowledge base by 50%.
- Continuously monitored chatbot performance by analyzing user intents, behavior patterns, and interaction flows to optimize training data and improve response quality.
- Maintained a dynamic knowledge base aligned with evolving product features and customer feedback, enabling scalable support automation.
- Delivered performance reports to stakeholders, highlighting KPIs such as response accuracy and engagement rate to support data-driven improvements.
- Researched and evaluated alternative conversational AI platforms (Microsoft Copilot Studio, Dialogflow) for future enhancements.

AI Product Database

- Led a cross-functional team of engineers to develop an AI-powered product search tool, enabling users to retrieve structured product information from a database using natural language queries.
- Built an Agentic Process Automation (APA) pipeline using Python, LangChain, and Retrieval-Augmented Generation (RAG), extracting key data fields from technical datasheets via LLMs (Qwen, LLaMA), with outputs stored in a MySQL database.
- Fine-tuned AI agents to extract precise data fields, significantly improving retrieval accuracy and the relevance of search results.
- Integrated the tool into the company website in collaboration with the IT team, resulting in a 25% increase in user engagement and a 5% rise in product queries within three months.
- Managed the full development lifecycle using Agile project management tools (JIRA, Confluence), ensuring timely delivery and stakeholder alignment.

1 SEP 2022 – 31 JAN 2024 Stuttgart, Germany

AI AUTOMATION SPECIALIST HYFINDR GMBH

- Developed and implemented an end-to-end automated sales and marketing pipeline in Brevo CRM using Make.com, integrating lead sources from trade fairs, events, and website inquiries with automated deal creation, follow-up tasks, and deal-closing processes.
- Automated business card scanning and lead capture using SnapADDY and Make.com, instantly adding new leads to Brevo CRM. This process eliminated manual data entry, reducing lead capture time and improving lead management efficiency.

- Automated event registration workflows and data collection using Make.com and Typeform, syncing leads with Brevo CRM to optimize the lead generation process and reduce manual follow-up tasks, improving lead capture efficiency by 30%.
- Integrated Power BI with Brevo using Make.com to develop marketing and email campaign reports, applying data modeling and transformation techniques to enable data-driven decisions.
- Implemented real-time automated workflows using Zapier to trigger email notifications for customer-related workflows, ensuring faster responses and increasing process efficiency.
- Developed the "Hyfindr" App using Microsoft Power Apps and Power Automate, with SharePoint as a data source, optimizing vendor negotiations at trade fairs based on key parameters, such as company size.
- Automated YouTube analytics reporting using a custom Python script and the YouTube Analytics API, reducing reporting time by 50%.
- Keen to explore and apply new tools like Retool to drive further automation and process optimization.

1 JAN 2023 – 31 JAN 2024 Stuttgart, Germany

BUSINESS DEVELOPMENT & VENDOR ONBOARDING SPECIALIST HYFINDR GMBH

- Led the onboarding of over 50 international vendors on Hyfindr's B2B marketplace, contributing to a 25% increase in platform sales and strengthening long-term partner retention.
- Conducted structured feedback sessions with both vendors and buyers to identify process gaps and implement workflow improvements, resulting in a 40% increase in vendor satisfaction and a 10% boost in website traffic.
- Developed interactive Power BI dashboards to visualize key sales KPIs (e.g., conversion rates, pipeline forecasts) for internal teams and stakeholders, supporting data-driven decision-making.

EDUCATION AND TRAINING

1 OCT 2017 – 30 SEP 2021 Aachen, Germany

MASTER OF SCIENCE IN COMPUTER AIDED MECHANICAL ENGINEERING RWTH Aachen University

1 JUN 2012 – 31 MAY 2016 Pune, India

BACHELOR OF ENGINEERING IN MECHANICAL ENGINEERING Pune University

LANGUAGE SKILLS

Mother tongue(s): **MALAYALAM**

Other language(s): **ENGLISH (C2)** | **GERMAN (B1) - ACTIVELY IMPROVING**

SKILLS

Technical Skills

Make.com | Zapier | n8n | Power Automate | Microsoft Copilot Studio | Voiceflow | OpenAI API | Langchain | RAG | Brevo | Microsoft Dynamics 365 | Power BI | JIRA | Confluence | Python (Basic) | API Integration & Webhooks

Soft Skills

Team-work oriented | Client onboarding | Stakeholder management | Organizational and planning skills | Cross-Functional Collaboration | Problem-Solving & Critical Thinking

ONLINE COURSES AND CERTIFICATIONS

Lang Chain: Retrieval Augmented Generation by DeepLearning.ai

- Used AI agents, chained calls, and memories to expand the use of LLMs.
- Created Agentic RAG chatbots to interact with own documents and data.

Building in Microsoft Copilot Studio

- Create copilot agent, including setting up topics, variables, entities, and plugins to meet unique business needs.
- Use generative AI with various data sources and control conversation flow to generate relevant, business-focused answers.
- Publishing copilot agent on multiple channels, monitoring copilot's performance and setting up proper authentication for secure access.
